

Reliable, innovative & custom-designed industrial solutions

SEAL DRUM: HELIPORTABLE & TOWABLE FLEXIBLE TANK

DESCRIPTION

PRONAL flexible tanks, are designed to supply advanced units on board of helicopters, planes and vehicles. Regarding capacities, SEAL DRUM can be rollable and slingable but also towable.

Because of material and process of manufacturing per vulcanisation in mould, they **can be dropped when full** from a helicopter at 12 meters height (for the 200 L) and at 5 meters height (for the 1000 and 1900 L).

Empty tank volume is only 15% of the full one. The plates are equipped with a self-sealing connection allowing the filling/draining with a hooker. Lifting rings ensure connection with the slings used in case of transport under helicopter. The towing bar is only used for the 1000 and 1900 L models for tracting, for pushing in any direction.

SEAL DRUM: HELIPORTABLE & TOWABLE FLEXIBLE TANK

DIMENSIONS

CAPACITIES		DIAMETER	LENGHT	WEIGHT	DIMENSIONS Folded cm	Working pressure bar
US GALLONS	litres					
50	200	60	100	20	85x95x25	0.3
265	1000	110	130	85	120x125x25	0.3
500	1900	135	160	135	150x180x25	0.3

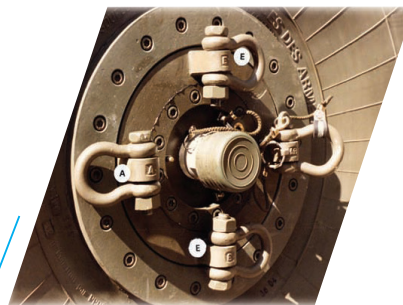

STANDARD ACCESSORIES

- Rollable 200l tanks:
 - Self-plugging adaptor
 - Filling pipe 2m lenght equipped with coupling and Guillemin or Camlock connection
- 1000l and 1900l towable tanks:
 - Self-plugging DN 50 adaptor instaled on revolving plate

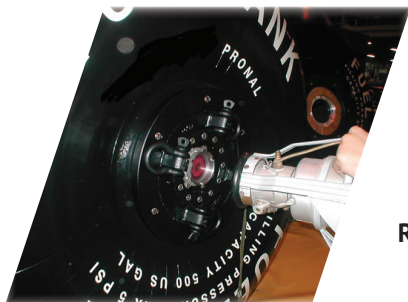

OPTIONS

**TOWING,
PUSHING OR
LIFTING BAR**

PLATE

**AIRCRAFT
REFUELLING
UNIT**

OTHER OPTIONS

- Refuel-Defuel valve limit pressure 5 PSI with aeronautic connection
- Filling & emptying hose, 1.6m equipped with DN 40 Camlock connections and cap
- Transport box

Please, contact us for higher capacities or particular specifications (mechanical or chemical resistance, accessories...)

Always concerned with the improvement of the quality of its products, Pronal reserves the right to modify specifications without prior notices / Non-contract pictures
